

BATRIBIKE®

ELECTRIC BICYCLES

The BATRIBIKE Micro lives up to its name as it is very compact when folded and lightweight too! Everything about this bike has been designed to save weight and space. Weighing in at just 9.5 kg (21lbs) including the battery and motor, The Micro is very easy to carry.

Design is the key to this stylish modern performer. The alloy frame conceals the 14.4V lithium battery and the two speed, 120 Watt High Torque magnetic motor can see you travelling along at up to 12mph. A suspension bush and comfort saddle combine to give a smooth ride and coloured mudguards protect the rider from inclement weather.

In its folded form it is easily transportable either in the smallest car or to carry with you on the tube or train. The integrated front LED light, which is operated by the same magnetic chip key that starts the motor, makes the Micro a definite gadget 'must have'.

£599

Micro

PRICE CORRECT AT TIME OF PRINTING - January 10 - Please check Website or Phone for details.
